

A line drawing of a human head and neck in profile, facing right. A medical device, labeled 30, is shown inserted into the neck. The device consists of a handle, labeled 32, and a probe, labeled 36. The probe is shown with dashed lines indicating its internal structure. The device is connected to a long tube, labeled 40, which is further connected to a branching structure, labeled 41. The probe 36 is shown with dashed lines indicating its internal structure.
